

“At Elevision we create full attention of your elevator guests, achieving your strong communication channel”.

Do you want to communicate with your elevator guests, but you are not sure how to get their full attention?

Elevison TruView transforms your elevator into a unique and effective communication channel.

Our virtual window technology delivers an incredible 'WOW - factor', changing a dull elevator ride into an amazing journey.

TruView, the elevator experience

TruView is a virtual window in the elevator showing an amazing fictional cityscape - or showing any view you can imagine. The screen perspective will move up-and-down together with the elevator. When the elevator moves, the view on the screen changes perspective, copying the movement of the elevator in real-time.

TruView, the elevator communication channel

TruView allows full control of on-screen content, e.g. internal messages or advertisements: position, size and dimensions are configured and accessible through a web-portal.

Your **7 benefits of TruView**

- ✓ Getting full attention of your guests
- ✓ Having a strong communication channel
- ✓ Manage on-line your own content
- ✓ Elevator brand independent
- ✓ Possible in almost every elevator type
- ✓ No connection with the elevator operating system
- ✓ No high investments, ask for our payment terms

ELEVISION: the ultimate elevator pitch

TruView, the technical features

The TruView technology requires no interface or connection with the elevator's control system. It only requires a power outlet and an internet connection. The TruView technology can be installed in almost any elevator.

The other Elevation elevator solutions

Elevation Display Solution

A Digital Signage Solution in your elevator. A display for advertisements or narrowcasting solutions which is controlled using a web-interface. Change the content, layout and / or colors anytime, anywhere.

Interactive displays

An Interactive Touch Surface with active content which responds to your touch. A great experience! As you touch the screen, any object present will interact with the visitor in new and exciting ways.

About Elevation

Elevation creates integrated elevator communication solutions for Hotels and Landmark buildings. Elevation is an innovative, technology driven full service provider. We develop, deploy and support the complete system: software, hardware and installation in your elevators. Our qualified and certified engineers work according to the highest standards and have ample experience with most elevators. We offer a **turnkey delivery!**
